7000 α extraSun

Versatility is key!

The new 7000 series is setting completely new standard in its class. Having four categories to choose from you will be able to select the perfect package for your customers. In addition to the great tanning performance we provide you with comforting features.

Have it your way!

The Intelligent Control System (ICS) with an innovative touch screen for comfortable use? ColorMotion Plus for a dynamic light design? X-tra Tan shoulder tanner? Focusing on the essentials? It's your choice!

Intelligent Control System (ICS)

Tanning with a special touch: The Intelligent Control System with its innovative touch screen simplifies the use of the new 7000 series. Your customer can customize their session quickly and intuitively. Easy access to maintenance features and service settings will assist you as the operator.

extraSunlight lamps

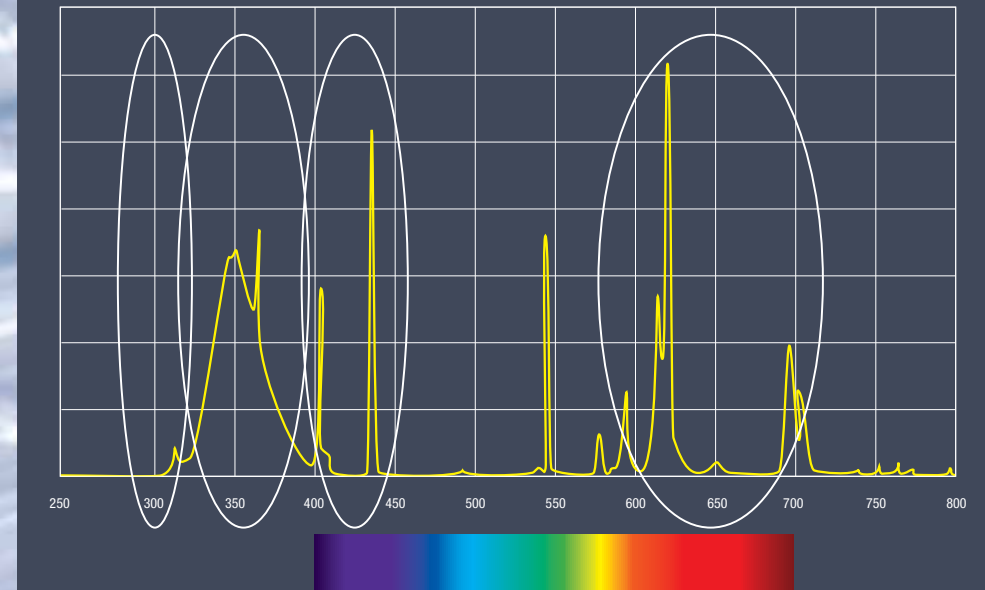

Vitamin D is essential! The best way to raise your levels is the exposure to sunlight. The one-of-a-kind extraSunlight lamps with an extra-high percentage of UVB ensure increased pigment development and vitamin D production.

smartSunlight lamps

Four spectral ranges in one single lamp:

- 1. UVB** develops pigments and essential vitamin D.
- 2. UVA** ensures an intensive and attractive direct tan.
- 3. The blue spectrum** cleanses the skin and ensures a healthy and fresh complexion.
- 4. The red spectrum** soothes the skin and stimulates collagen production.

The 4 most important wavelengths of light combined in a single lamp.

Smart light for the face and décolleté

The Smart Light Technology (SLT) for the face and décolleté combines sunlight and soothing beauty light in an innovative high pressure system. The result: Especially pleasant, gentle tanning, a beautiful skin appearance and a fresh glow. The system, which consists of hybrid high pressure lamps, specially coated filter glass and a homogenous reflector, ensures a gorgeous and long-lasting tan. With its red spectral components the beauty light already cares for your skin while you tan.

Shoulder tanner

The new Smart Light Technology (SLT) is also available for the shoulder area. The combination of intensive sunlight and nourishing beauty light in one radiator tans the shoulder areas in a pleasant and gentle manner, while also providing an especially pleasant feeling for your skin.
